ADVANCED COOLING SYSTEM PROTECTION

01 // OUTSTANDING FEATURES

- Compatible with all reservoir style cooling systems that use Ethylene Glycol based coolant
- Fortifies and extends service life of new coolant
- Lowers metal loss to less then 1 mg
- Can help regulate EV Battery Temperatures
- Can be used in HEV, EV and ICE cooling systems.

02 // DESCRIPTION

Designed to fortify coolants used in hybrid-electrical vehicles (HEV) and battery electrical vehicles (BEV) with advanced corrosion inhibitors. It is formulated for use in all types of ethylene glycol based, low-conductivity coolants used in indirect cooling systems.
