COMPLETE PROTECTION

#0445 COOLING SYSTEM PROTECTOR

01 // ABOUT

A concentrated additive that provides complete protection for the entire cooling system. It protects the cooling system in four different ways. It contains a concentrated blend of corrosion inhibitors, anti-foaming agents, pump lubricants and sealing compounds.

Cooling System Protector is specially formulated to improve heat transfer qualities, helping reduce operating temperatures while towing, carrying heavy loads, or operating in high temperatures.

02 // PRODUCT BENEFITS

- **Improves heat transfer**
- **Compatible with all types of coolant**
- **Provides rust and corrosion protection**
- **Eliminates the need to use 2 or 3 different products**
- **Safe for use with all types of systems (cast iron, aluminum, bronze, copper, plastic)**
