05 // APPLICATION

DIRECTIONS: TEST PRODUCT ON AN INCONSPICUOUS AREA FOR COMPATIBILITY BEFORE USING ON ENTIRE SURFACE. WHEELS SHOULD BE COOL, DRY, AND OUT OF DIRECT SUNLIGHT.

1. Dilute 1 to 1 with water for normal cleaning jobs. Use undiluted for tough jobs.
2. Saturate entire wheel with product and allow to soak into wheel for approximately 1-2 minutes. Do not allow cleaner to dry on surface.
3. Rinse thoroughly with water. (Extremely dirty wheels may require a second application and agitation with a brush.)
4. Dry with a soft, clean towel to prevent water spots.
