ENHANCED PROTECTION

#0143 COOLING SYSTEM MULTI-TREATMENT

01 // ABOUT

A concentrated additive that provides complete protection for the entire cooling system. It protects the cooling system in four different ways. It contains a concentrated blend of corrosion inhibitors, anti-foaming agents, pump lubricants and sealing compounds. This product contains a unique corrosion and rust inhibitor that enhances protection of iron, aluminum, copper, and solder surfaces. Cooling System Multi-Treatment™ is designed to fortify and extend the service life of antifreeze and is compatible with all types of coolant.

02 // PRODUCT BENEFITS

- **Eliminates the need to use 2 or 3 different products.**
- **Compatible with all types of coolant**
- **Proven to increase corrosion inhibiting performance of treated coolant.**
- **Increases protection of water pump and reduces potential damage to pump surfaces.**
- **Sealing compounds help stop minor leaks and seal cracks in the radiator and block.**
